

Project Proposal

Cheers, Mate!

Main Idea

Cheers, mate! is an iOS Drinking Game app for 2 to 10 players (or "mates"). The app will use a list of randomised prompts for players to do. Once a prompt has been used it can't be used again. Examples of prompts include "Mates with blue eyes drink", "Play Thunderstruck", and "Reveal your search history".

User Stories

- As a user, I want to be able to open the app and see the logo of the app as well as a start button below it on the home page.
- As a user, once I press the start button, I want to be redirected to the player settings page, where I can then customise the number of players and their names.
- As a user, I want to be able to play the game with the press of a button once I have finished customising the players.
- As a user, I want the app to randomly select a prompt and display it on the game page after I press the play button.
- As a user, I want the player's name to appear at the top of the game page when it is their turn.
- As a user, I want the players to take turns in the order they were originally added in.
- As a user, I want to be able to press a "home" button (the app logo) that will bring me back to the home page, where I will be able to once again customise my players and start the game again with the list of prompts regenerated.

Technology Used

This app will be created using React Native, which is a cross-platform mobile application development framework. React Native allows us to use one code base for both Android and IOS. This will reduce the development time and cost as we don't need to create separate codes for Android and IOS. To track the prompts, a database will be used.

Navigation

- **Home page** - This will have the logo of the app and a start button below. The Start button redirects you to the Player settings page.
- **Player settings page** - This will say "Mate Setup" at the top. Here you will have a list of players with a plus (green circle button with a "+" on it) and a minus button (red circle button with a "-" on it) next to their name to add and remove players from the game. There can be only 2-10 players. There will be a "Play" button at the bottom of the page that then redirects you to the Game page once pressed.
- **Game page** - On the top of the screen there will be the player's name whose turn it is and the prompt written in larger font in the centre of the page, below the player's name. Below the name and prompt there will be a "Next Mate" button that will move on to the next player and prompt when pressed. On the top left hand corner, there will be a small app logo that acts as a home button that will bring the player back to the home page, where they will be able to press start, then customise the players again and restart the game with the list of prompts regenerated.

UI Mockups

Prompts

1. Everyone Drinks
2. Mate to your left drinks ←
3. Mate to your right drinks →
4. Your neighbours drink ← →
5. You and a mate drink
6. Switch drinks with the mate on your right →
